REMARKS

Claims remaining in the present application are numbered 1-22. Claim 1 has been amended herein. No new material has been added.

Rejections

Claims 1-22 are rejected under 35 U.S.C. 102(b) as being anticipated by

Imaino (U.S. Patent No. 5,929,326), hereafter referred to as Imaino. The rejection is

respectfully traversed for the following rational.

Applicants have reviewed Imaino and respectfully assert that the claimed

limitations of amended Claim 1 are not anticipated by Imaino. Particularly, Applicants

have amended Independent Claim 1 to include the limitation that the head-disk

interaction sensor is "integral with said flexure." Support for this limitation can be found

at least on page 10 (last sentence of paragraph 28) which states "An accelerometer

205 is fabricated as an integral part of flexure 202."

Applicants assert that Imaino fails to teach or suggest a head-disk interaction

sensor that is integrated within the flexure, as claimed. Particularly, Imaino teaches in

column 5, lines 2-5 "The sensor element 68, preferably comprising a piezoelectric or

piezoresistive material as described above is provided adjacent and preferably bonded

to slider 63, to form the glide sensor 60." Imaino fails to teach or suggest integrating

the sensor within the flexure, as claimed.

For this rational, Claims 1-22 are not anticipated by Imaino. As such, Applicants

respectfully request the rejection be removed and request allowance of Claims 1-22.
